LuLu

Your story. Your safety. Your choice.

An everyday journal with an extraordinary purpose.

LuLu provides a personal space to write, preserve important experiences and decide what happens next.

LuLu

What happens before someone is ready to ask for help?

Something happens.
You want to remember it.
You do not know whether it will happen again.
You may not be ready to tell anyone.

The need for a safe record can begin long before a formal report.

LuLu

Finding help should not mean piecing everything together.

LuLu brings continuity, privacy and choice to the moments between experience and action.

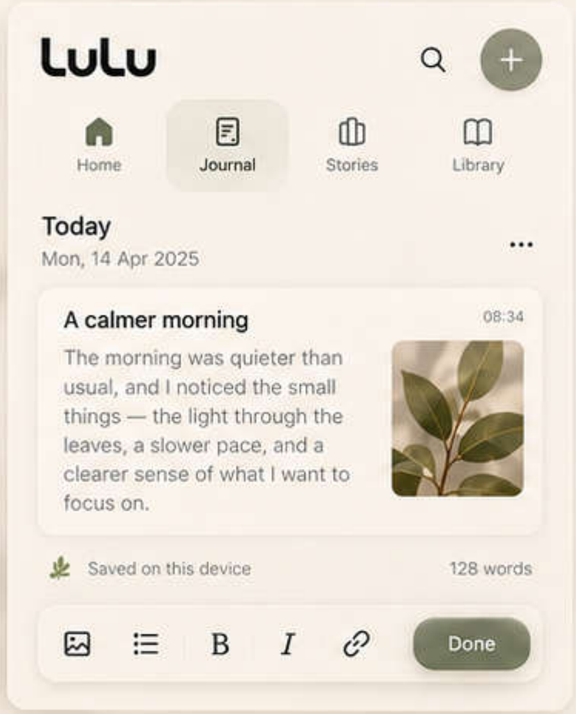

LuLu

A CALMER, MORE THOUGHTFUL INTERNET.

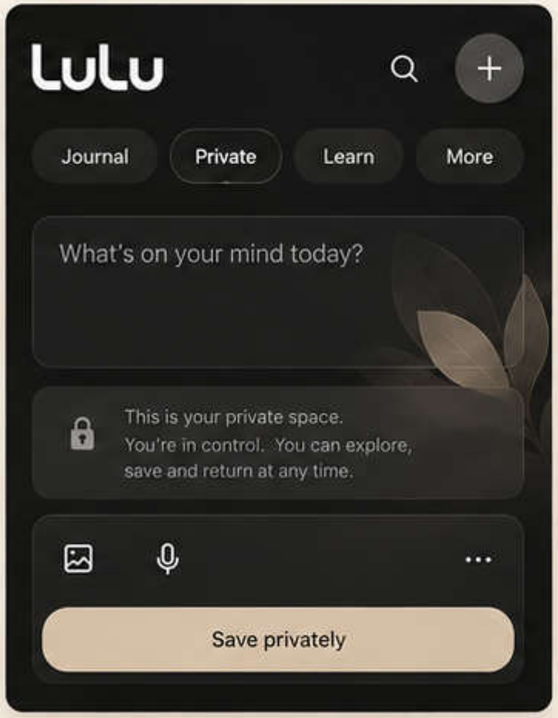

One place to begin. Your choice of what comes next.

The LuLu experience

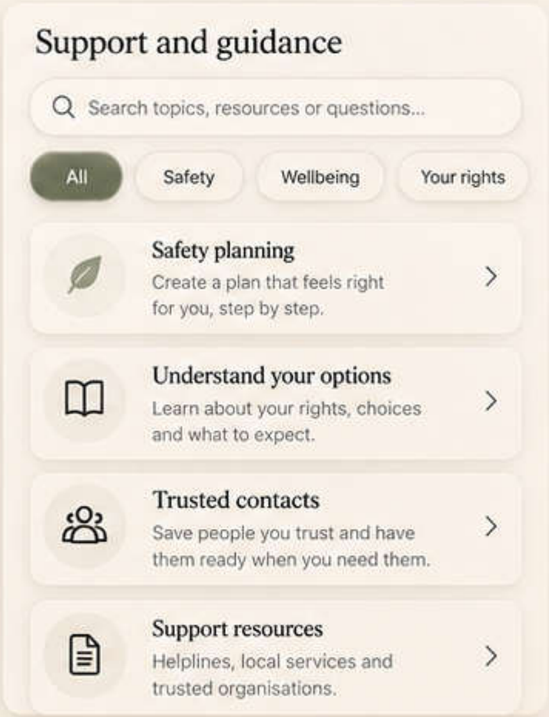

01 Write
A familiar everyday journal

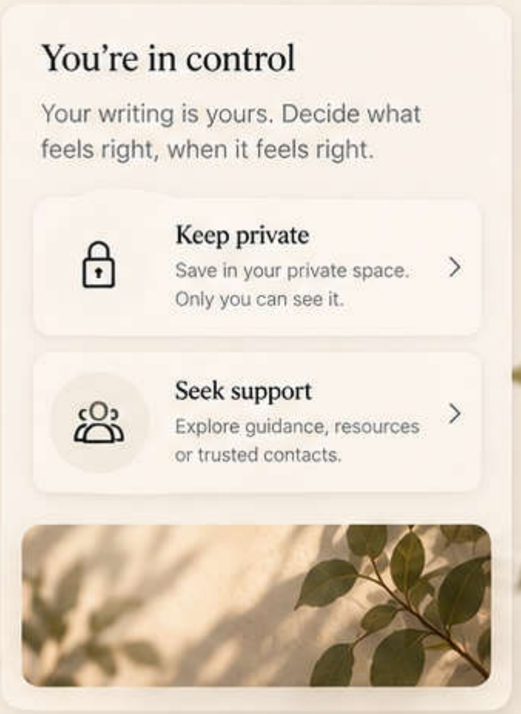

02 Protect
Discreet private capture

03 Understand
Explore experiences and options

04 Choose
Keep private or seek support

From everyday journaling to protected writing, LuLu helps users document, understand and decide what to do next.

lulu.thisisphila.co.za

LuLu

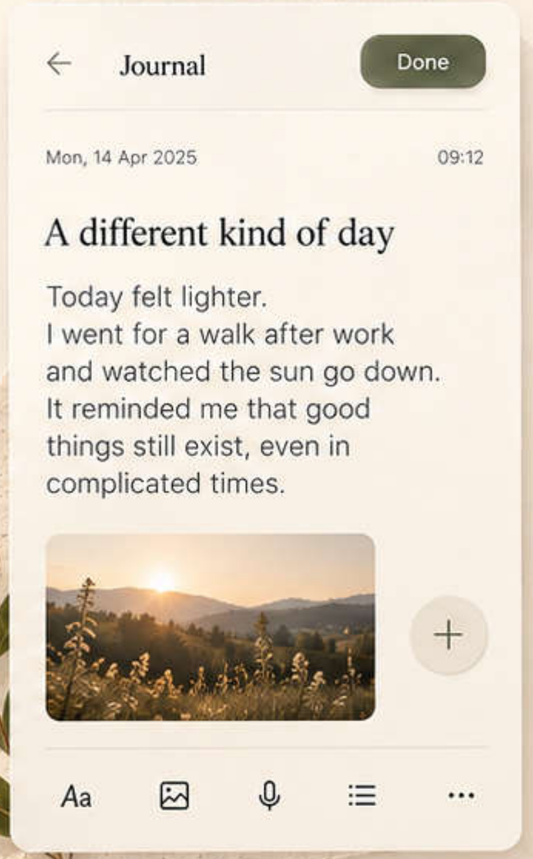

A story that begins with writing.

Start with a simple entry. When something feels more personal, you can protect it. And later, return to your story anytime, on your terms.

Life doesn't always unfold in a straight line. LuLu gives you a flexible space to write, protect and return — as your story evolves.

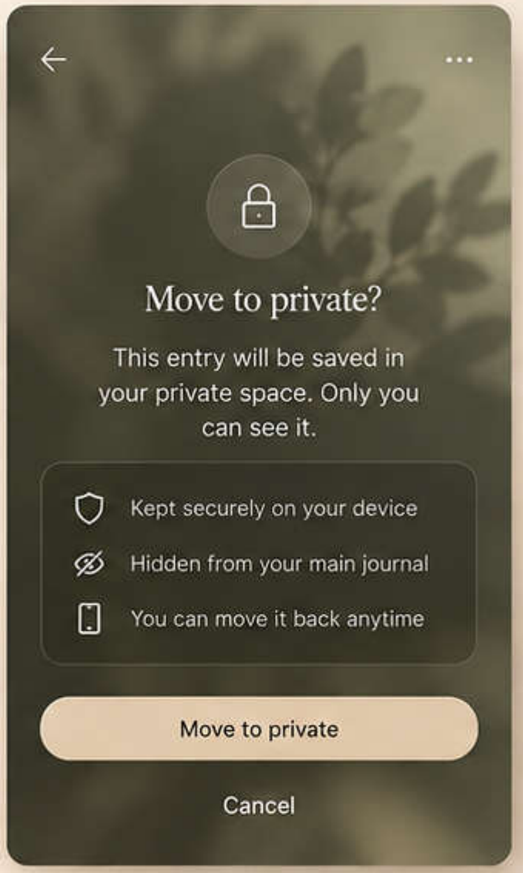

01 Write

Capture a moment, thought or experience — just as it is.

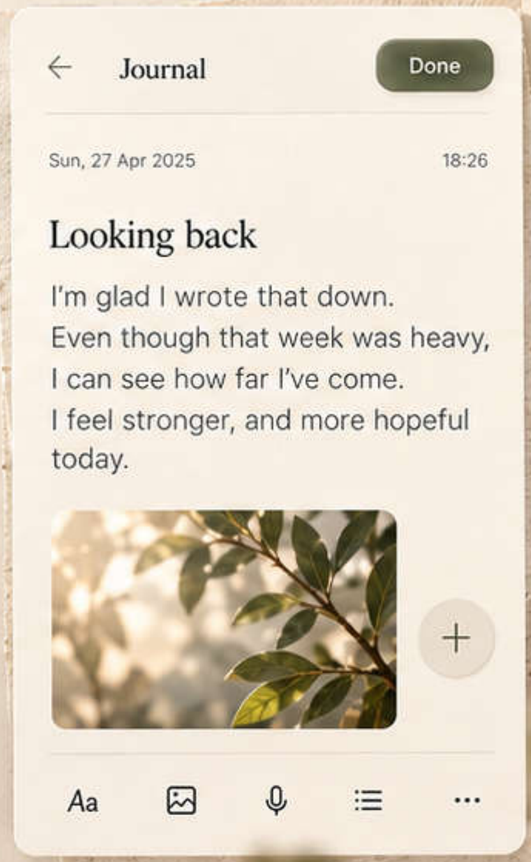

02 Protect

If something feels more sensitive, you can move it to a private space.

03 Return

When you're ready, you can come back to your story.

LuLu

Private when you need it. Ordinary when you don't.

The freedom to be completely honest, with privacy that fits naturally into everyday life.

Protected access

Unlock your private space with a passkey. Only you can open it.

Concealed passages

Keep sensitive parts hidden in your private space, visible only to you.

Today was harder than I expected. I've been feeling a mix of gratitude and uncertainty,

I'm proud of how I handled it. Small steps still count, and I want to remember this feeling — it's part of the bigger picture.

Quick exit

Leave private mode anytime and return to your ordinary journal.

LuLu

Some moments need more than words.

LuLu helps you preserve a private record with multiple types of evidence — just as the moment happened.

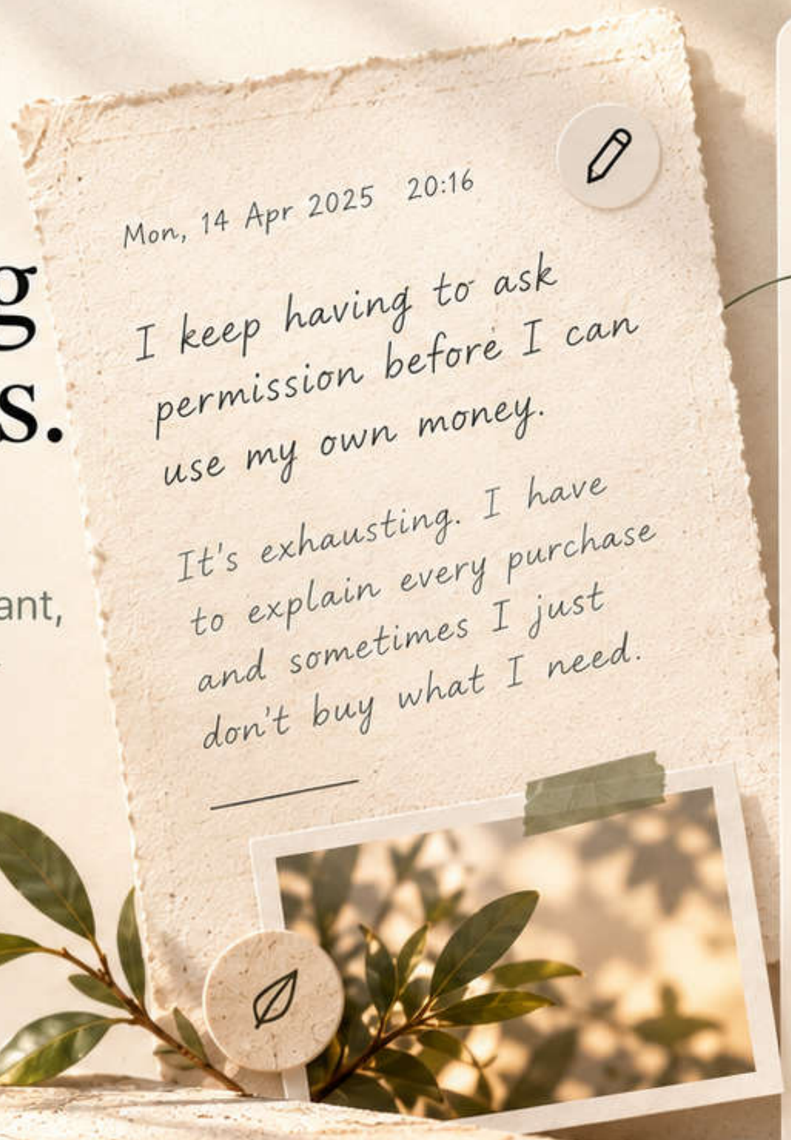

Write, capture photos, record audio, attach documents and more, all in your private space. Every addition is kept in order, so nothing is lost and nothing is overwritten.

LuLu

Understanding creates options.

LuLu helps you identify possible patterns, shows what may be relevant, and offers supportive next steps — while you remain in control.

Possible pattern:

financial control

Your entry may relate to patterns of financial control, where access to or use of money is restricted by someone else.

Learn about this topic
Understand what financial control can look like and how it may affect you.

Speak with someone trusted
Consider talking to a friend, family member or someone you trust.

Explore professional support
Find confidential services, helplines and local organisations.

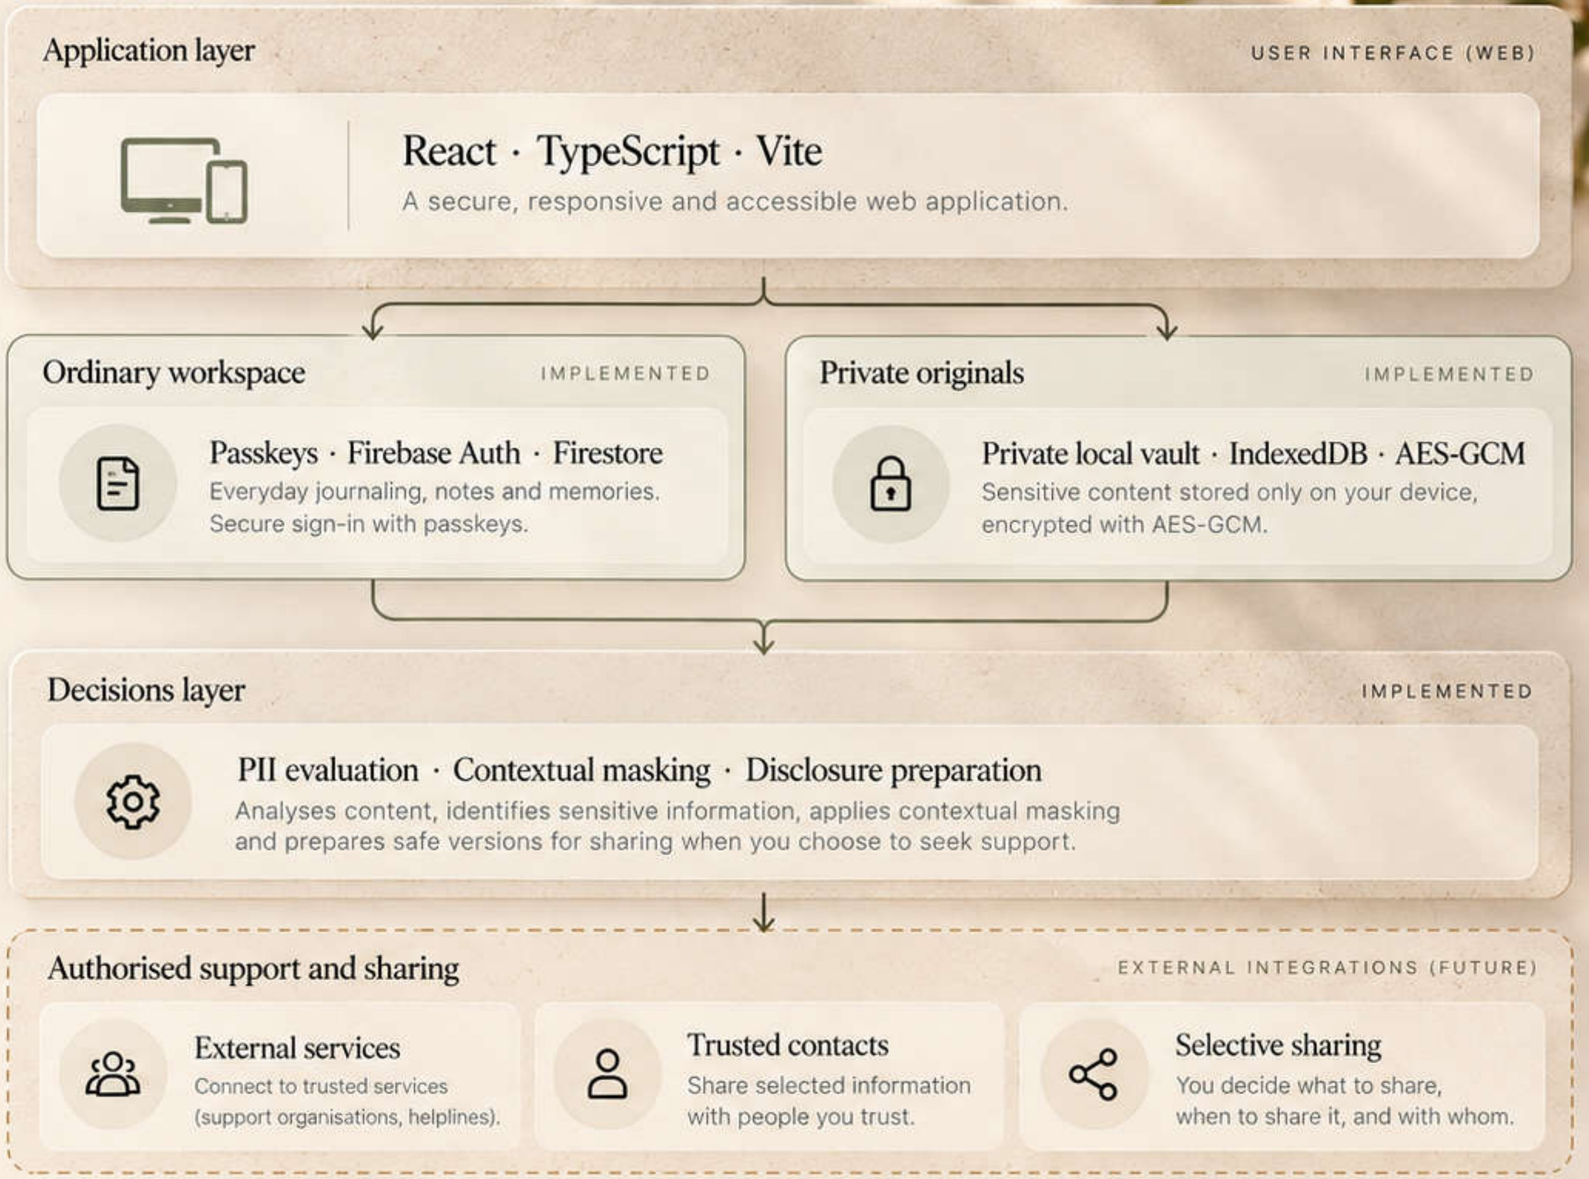

Before showing guidance, LuLu checks for identifying details and keeps your information private. Nothing is shared without your consent.

LuLu

Designed around ownership and control.

Ordinary journaling, private originals, decision processing and external support are intentionally separated so you keep control over what is stored, processed and shared.

Each part has a clear purpose and boundary. Your data stays with you, and only you decide what leaves your private space.

LuLu

Built for South African realities.

LuLu supports people where they are, with discretion, local relevance and practical access to support.

Language

Multilingual writing, with the wider ambition to support South African languages, so more people can tell their stories in their own words.

Connectivity

Local-first capture, with offline-friendly use, so you can write and save even when data is limited or unavailable.

Discretion

An ordinary journaling experience, protected access and a quick exit, designed to fit naturally into everyday life.

Assistance

Trusted companions, Trails and relevant local services, connecting you to the right support when you need it.

- Local services
- Trusted contacts
- Community resources
